For example, if a search engine understands a phrase to be related to another word or phrase it may return results relevant to that other word or phrase even if the words you searched for are not directly associated with a result. You'll get an overview of Google's algorithm adjustments such as the Panda, the Penguin, and EMD, and understand how those changes are impacting searches in Keyword Funnel The relationship between various related keywords that searchers search . Visitors may visit this page if they are having problems finding pages on your site. Cutts emphasized that there are million domain names and a mere 24, employees at Google. It also includes paid strategies and strategies on how to use research, data analysis and experimentation to build an SEO structure that is suitable for your business. A search engine may also place slightly greater weighting on these words than regular text, but if you write natural page copy and a word or phrase appears on a page many times it probably does not make sense or look natural if you

bold ever occurrence.

Also, many automated content generation techniques rely on recycling content. It is always beneficial to organize your content so that visitors have a good sense of where one content topic begins and another ends. Search engines also like to outsource their relevancy issues by calling low quality search results spam.
