Multiple indicators are needed to reflect both the adequacy of food intake e. The greatest concentration of poverty is in sub-Saharan Africa and in South Asia, where subsistence farming is associated with mixed farming of both food animals and crops. Hawkes, and M. WorldAquaculture. Neufeld explained that the utility of anthropometric indicators to provide a complete reflection of the nutritional status of a population is further complicated by the potential for concurrent micronutrient deficiencies, even in an apparently well-nourished group.
